

Literature Review How-To-Do:

1. Start by selecting a few research papers related to your chosen research topic. Make sure these papers are related to your topic so that you get beneficial information. Also ensure you look at the credibility of authors, journal reputations, and recency of publications.
2. Next, open <https://www.chatpdf.com/> and input one of your papers into the website (by inputting the file of the research paper). Chatpdf will take the pdf of the paper and will be able to answer any questions you have.
3. Once you input your articles into the website, you can ask the AI to give you a summary of the paper. You can also ask the AI for any specific insights about the paper, such as key findings, methods used, or gaps identified in the paper. Do these things for each paper you have.
4. Finally, you can use these gaps to frame the focus of your research project and explain how your study will contribute to the field.
